

# GIRISH CHANDAR G

Ann Arbor, Michigan

☎ +1(734)8810776 ✉ ganesang@msu.edu 🌐 Girish Chandar G 📧 girish1511

## OBJECTIVE

Motivated graduate student interested in pursuing Ph.D. in the domain of Computer Vision and Deep Learning focusing on 3D reconstruction, and generation. I have relevant academic knowledge and research experience pertaining to Deep Learning applications in Computer Vision and proficient in Python and use of deep learning frameworks like PyTorch and Tensorflow.

## EDUCATION

<b>University of Michigan, Ann Arbor, MI, USA</b> <i>M.S. Electrical and Computer Engineering</i>	Aug 2021 – Apr 2023 GPA - 4/4
<b>Indian Institute of Technology Gandhinagar, Gandhinagar, India</b> <i>B.Tech. Electrical Engineering (minor Computer Science)</i>	July 2016 – Aug 2020 GPA - 8.98/10

## COURSEWORK / SKILLS

- |                                       |   |   |                              |                                  |
|---------------------------------------|---|---|------------------------------|----------------------------------|
| • Foundations for Computer Vision (A) | • Matrix Methods for Machine Learning and Signal Processing(A+) | • 3D Computer Vision (A)                | • PyTorch, Tensorflow, MXNet | • Numpy, OpenCV, Sklearn, Pandas |
| • Machine Learning (A)                |   | • Deep Learning for Computer Vision (A) | • MATLAB, LabVIEW            | • C++                            |

## POSITION

<b>Research Assistant</b>   Dr. Xiaoming Liu, Michigan State University 🔗	Present
<b>Graduate Student Research Assistant</b>   Dr. Stella Yu, University of Michigan-Ann Arbor 🔗	Jan 2023 – Apr 2023
<b>Research Intern</b>   NVIDIA 🔗	May 2022 – August 2022

## INTERNSHIP

<b>Stereo Hazard Detection</b>   NVIDIA   PyTorch <ul style="list-style-type: none"><li>Implemented end-to-end deep learning model using custom UNet as the backbone for feature map extraction.</li><li>Better performance than existing algorithm in terms of achieving <b>zero</b> false positives.</li></ul>	May 2022 - Aug 2022
<b>Auto Shape Detection in Machine Vision</b> 🔗   Zentron Labs   Python (Numpy, OpenCV) <ul style="list-style-type: none"><li>Implemented Arc Detection algorithm that gives accuracies of <b>100%</b> on simulated data and 80% on real data.</li><li>Improved Line and Circle Detection accuracies from <b>65% to 90%</b></li></ul>	Oct 2020 – Aug 2021
<b>Optimization based Inverse Rendering</b> 📷   University of Texas Dallas   PyTorch, MXNet, Numpy <ul style="list-style-type: none"><li>Implemented algorithm for 3D face reconstruction from 2D images.</li><li>3D Morphable Model (3DMM) used as apriori mesh for efficient inverse rendering.</li></ul>	May 2019 – July 2019
<b>Microscopic Image Analysis</b> 📷   Clemson University   LabVIEW <ul style="list-style-type: none"><li>Developed LabVIEW scripts for analyzing images from Magnetic Rotational Spectroscopy (MRS) experiment.</li></ul>	May 2018 – July 2018

## PROJECTS

<b>Epipolar Geometry-Based Artifact Removal in Camera View Projected LiDAR Depth Maps</b>   PyTorch <ul style="list-style-type: none"><li>Novel algorithm to remove incorrect depth information from projected depth maps.</li></ul>	Present
<b>SAR-NeRF</b>   PyTorch <ul style="list-style-type: none"><li>Research focused on modifying NeRF for 3D reconstruction of complex-valued radar data.</li></ul>	Apr 2023
<b>Small NeRF</b> 📷   PyTorch <ul style="list-style-type: none"><li>Implemented a modified version of NeRF to reduce training time and computational cost.</li><li>Experimented with multiple architectures to determine the best approximation of the original NeRF.</li></ul>	Apr 2022
<b>Co-Tuning for Transfer Learning on TACO Dataset</b> 📷   PyTorch <ul style="list-style-type: none"><li>Implemented and verified the novel transfer algorithm proposed in "Co-tuning for Transfer Learning".</li><li><b>First team</b> to implement co-tuning on TACO (Trash Annotations in Context) dataset.</li></ul>	Dec 2021
<b>Classification of Cancer Progression by Structuring Clinical Data</b>   Tensorflow <ul style="list-style-type: none"><li>Developed a <b>novel model</b> to predict the probability of cancer by structuring Electronic Health Records using NLP techniques.</li><li>Explored MIMIC-III dataset extensively and verified its potential to be used for cancer prediction</li><li>Structured the clinical data using ClinER, and BioBERT embedding</li></ul>	Dec 2019
<b>Forensic Camera Model Classification using Local Binary Pattern</b>   MATLAB <ul style="list-style-type: none"><li>Implemented algorithm to identify source camera from images.</li><li>Implemented One vs All classification model using Local Binary Patterns as features.</li><li>Created <b>novel dataset</b> to test the model.</li></ul>	Apr 2018
<b>Unsupervised Cross-Domain Image Transfer using GAN</b> 📷   PyTorch <ul style="list-style-type: none"><li>Implemented Encoder+GAN with modified loss and verified the results for cross-domain transfer between MNIST and SVHN.</li></ul>	Apr 2019
<b>Patch based Multi-View Stereopsis</b>   Python (Numpy, OpenCV)	Apr 2020
<b>Normalized cuts and segmentation</b> 📷   Python (Numpy, OpenCV)	Apr 2019
<b>Face Detection using Eigenfaces</b> 📷   Python (Numpy, OpenCV)	Dec 2018
